AbeBooks.com: Beyond the Checkride: Flight Basics Your Instructor Never Taught You, Second Edition (9780071822534) by Fried, Howard, Gailey, Gene and a great selection of similar New, Used and Collectible Books available now at great prices.
THE ESSENTIAL GUIDE FOR NEW PILOTS--FULLY UPDATED! Covering the latest FAA regulations, Beyond the Checkride, Second Edition, is packed with invaluable lessons learned by trial and error based on the real-life experiences of hundreds of pilots. Originally written by legendary flight instructor Howard Fried and thoroughly revised by veteran pilot Gene Gailey, this practical resource takes you, step by step, through a flight from the perspective of a flight examiner. Learn from other pilots' mistakes--it's easier and safer, and it could even save your life. FEATURES UP-TO-DATE COVERAGE OF: Rarely taught basics, including maneuvering speed, propeller safety, night flying, and more Paperwork and other requirements Pilot certificates and ratings Human factors that affect flying, including fatigue and emotions Flight safety and accident prevention Aircraft control Surviving spins, stalls, spirals, and more Flying advanced aircraft Weather conditions Air traffic control FAA regulations

Asserting that a flight certificate is a pilot's "license to learn," this unique book offers valuable lessons learned by veteran pilots. Using the anecdotal style that has made his Flying magazine column so popular, Fried bridges the gap between pilot training and in-flight experience with his advice on vital but often under-emphasized areas of: maneuvering speed; weight and balance; aircraft control; prop safety; night flying; altitude.

* Picks up where flight training ends--shows how to get best performance using tips and tricks not taught in school * Wide-ranging coverage includes flying with family, handling different airport types, test-flying, joining a flying club, and flying for money * Discusses mastering advanced navigation systems and handling all types of weather

A vital resource for pilots, instructors, and students, from the most trusted source of aeronautic information.

Volume 2 of The Thinking Pilot's Flight Manual carries on the widely praised, penetrating, and clear-headed approach of Volume 1, addressing matters of importance to pilots that ordinary flight training manuals never touch. It delves into everything from the realities of making the go/no-go decision during the takeoff roll, nailing spot landings, which emergencies to practice, and how to take babies and kids flying. It explores how we scare our passengers without realizing it, IFR training in IMC, and takes a hard look at spin training. Rick Durden is one of three 2015 recipients of the Endeavor Award, honoring volunteer pilots who have made significant contributions to flying to serve the public. For 25 years he has made flights in remote areas of the U.S. and Central America in support of conservation. He is an Airline Transport-rated pilot with experience in over 200 types of airplanes, a practicing aviation attorney who has been involved in hundreds of aircraft accident cases, writer, aviation magazine editor, safety counselor, and flight instructor.

From the FAA, the only handbook you need to learn to fly a powered parachute.

"In his latest book, LeRoy Cook writes to new flight instructors but his guidance regarding how to teach people to fly is a must-read for any flight instructor -- or anyone aspiring to become one. LeRoy Cook's book is of the kind sorely needed in the aviation community: in the age of glass cockpits, flight training is producing electronic data managers and as a result, stick and rudder skills have deteriorated. LeRoy Cook does not disparage the advanced avionics that are part of aviation today; instead he emphasizes the basics of flight and the eclectic craft of teaching those basics. Cook never stopped learning about piloting; even after almost 60 years of flying he is still exploring the magic of lift, the symmetry of balanced flight, the mystery of the perfect landing -- in this book, as flight instructor he is happy to share his learning quest on these topics with those that share his love of flight. He writes in the introduction here, "Flying, unlike many other activities, cannot be evaluated from afar. There has to be an initial period of participation before a decision can be made about continuing to devote time and treasure to the training." Cook is author of numerous articles and books about flying and they range from the techniques of piloting an airplane to the joys of being in the air. He writes with a quiet, plain-spoken philosophy that encourages flyers to do their best." -- Provided by publisher.
