## Read PDF Big Bang And Other Explosions In

The researchers reckon that the hole was made by a colossal burst of energy from a supermassive black hole at the centre of one of the cluster's galaxies. They estimate that the explosion involved the release of  $5 \times 10^{61}$  erg ( $5 \times 10^{54}$  J) – which is the energy that  $10^{20}$  Suns would output
