That being said, I will offer a few observations on operating the 'Flagship' combines (that's what CaseIH calls their 7010/8010/7120/8120/9120 combines) as compared to the older Axial-Flows. The #1 thing is that the Flagship combines do NOT have a cleaning system that will bail you out of a poor threshing setup like the old AFs will.

This combine harvester is built to provide up to 295kW or 395 horse power, delivered from its powerful Case IH engine to the 16.182t AFX 8010 machine. The AFX 8010 is categorised in the more powerful machine segment in the combine harvesters category. The model's dimensions are 7.964m x 3.5m x 3.905m.

Case IH AFX 8010 Specifications & Technical Data (2003) ...
Talked to my local dealer today about our 8010 combine. I told them we would like to get our 2388 back, get a brand new 8010 with all the updates, or get all the updates on our current 8010 and another year warranty to take us through next years corn, milo, and sunflower harvest. I don't care which option they choose.

Service Team | Case IH
I know this is a marketing forum but there just isn't enough action on the machinery site. I know this bugs some of you so my apologies in advance. We bought an 2004 8010 at the last Ritchie Bros auction. It turned out to be a great combine for our relatively small acres except for the fact that the rad needs blowing out 2-3 times per day or more if wind and chaff conditions are bad.

This book comprehensively documents the International Harvester Company's activities from its inception to its merger with Case as Case IH and their influence in Australia and New Zealand. IHC began with a merger of harvesting machinery companies to for the International Trust, the world's biggest farm machinery enterprise at the time. Then IHC became involved with tractors to become the world's largest tractor and full-line machinery maker, setting production records that stand to this day.

The first axial flow combine transformedthe industry and was hailed as the mostsignificant piece of farm equipment builtin the 20th century. The axial flow usedadvanced technology to process crops fasterand more efficiently than anything else onthe market.The axial flow started with researchdone by a rogue Swediah engineer in the1950s, was continued in secret by a group ofdedicated engineers from East Moline, Illinois,who did their work in a top-secret garage thatonly a select few were allowed to enter.Thebook tells the story of how extensiveresearch and development allowed IH to builda new machine that took the market by storm.Done with dozens of interviews ofengineers, salespeople, and customers, thebook captures the behind the scenes dramaand the cloak and dagger encounters withrival companies personnel and machines.The dramatic text is accompanied by morethan 300 archival images, concept drawings,sketches, and new photogrpahy of themachines and men at work today.

Nothing says quality and luxury like a custom built-in storage unit, and no project offers greater satisfaction and cost savings than a DIY built-in project. This detailed DIY book gives complete illustrated instructions for dozens of must-have built-in projects, including window seats, home theater units, buffed cabinets, and bathroom storage units.
