Winner of an AJN Book of the Year Award! This extensively revised and updated edition is designed to be used as a guide for nursing management of the common gynecological conditions of women, for use in community-based or ambulatory settings. The 8th edition has a number of special features: New information on contraceptive methods, the latest CDC guidelines for management of sexually transmitted diseases, information on smoking cessation and assessing risk of heart disease in women, osteoporosis assessment and prevention, management of abnormal Pap smears, hormone therapy, breast conditions and breast cancer risk, and emergency contraception. Extensive appendices include dozens of patients handouts, a health history form, informed consent forms for contraceptives, and a self assessment of HIV/AIDS risk.

This volume provides a primary source of information about reversible methods of contraception in a question and answer format. This edition covers new developments including the patch, injection, the mini pill and Cerazette and incorporates the new guidance on 'missed pills' from the WHO.

In the 25 years since the first edition of Comprehensive Gynecology, many scientific advances have occurred in medical practice. The first four editions were largely the work of the original four editors: Drs. William Droegemueller, Arthur L. Herbst, Daniel R. Mishell, Jr., and Morton A. Stenchever...With the staggering volume of medical literature published and the complexities of the gynecologic subspecialties, we have collaborated with additional experts for the sixth edition. We've "examined disease" and added a new chapter on the interaction of medical diseases and female physiology. We've "investigated discord" with new authors to completely rewrite the emotional and psychological issues in gynecology and the legal issues for obstetrician-gynecologists. Other chapters have delved into the controversies in breast cancer screening, vitamin D use, the ongoing debates in hormone therapy, and vaginal mesh use for pelvic organ prolapse surgery.
