Therapy and counselling can give much-needed support by providing people with dementia, and their carers, the opportunity to speak in confidence about the issues that might be troubling them. Talking therapies can help people come to terms with a dementia diagnosis, identify ways to live with the condition and can also help with related issues, such as anxiety and depression.

Dementia & Alzheimer's Counselling - Counselling Directory

Once the appropriate counselling setting has been provided, it is time to apply basic communication skills to help improve the client's expression of emotions and formulation of thoughts. Such rules are beneficial for any communication process, but particularly important during a counselling relationship.

AIPC Article Library | Communication and Counselling

Counselling is a talking therapy that involves a trained therapist listening to you and helping you find ways to deal with emotional issues. Sometimes the term "counselling" is used to refer to talking therapies in general, but counselling is also a type of therapy in its own right.
