As a registered nurse for the last 28 years, my primary clinical expertise has been working in the pre-hospital environment as a flight nurse and a paramedic, as well as continuing to work in a variety of clinical areas which include the emergency department, pediatrics and endoscopy. My extensive clinical background has also given me the opportunity to work as a legal nurse consultant with one of the largest law firms in Arizona. As an EMS educator and program director of paramedic training programs for the last 20 years and most recently as the National Clinical Educator for one of the largest air medical transport companies, I truly enjoy teaching in a simple manner as to assure that students do have a strong basic understanding in making critical care decisions and that they will be providing the highest quality of patient care beginning from the least to the most invasive management of care for the patients they are transporting. My goal as a professional and as an EMS educator has always been and will continue to encourage students to have the desire to learn and grow in their profession, as well as contribute to EMS in a way that inspires positive change. "Tell me and I ll forget; Show me and I may remember; Involve me and I ll understand " www.backtobasiccourse.com

Critical care transport is a highly-competitive industry and to become a Flight Medical Provider(TM) you have to be the best.Since 2011, IA MED has helped thousands of students launch careers as advanced prehospital and critical care professionals by providing the most comprehensive, flexible, and accessible critical care education in the Nation.By presenting complex medical concepts through straightforward instruction, we make learning critical care simple - regardless of your current medical ability or experience. Our unique approach to advanced medical education has made IA MED(R) the industry-standard and a fan-favorite among paramedics, nurses, and other industry providers.The Flight Medical Provider Study guide will review the fundamentals of advanced prehospital care and critical care transport while also helping students as they prepare and successfully challenge the industry's most challenging exams: the Flight Paramedic Certification (FP-C), Critical Care Paramedic Certification (CCP-C) and Certified Flight Registered Nurse (CFRN) exam!This is EMS. Re-imagined.

This guide is designed with the special needs of field practitioners in mind. This useful, quick reference guide helps speed recognition of lab values, 12 lead ECG interpretation, fibrinolytics agents, hemodynamic monnitoring, IABP's, rapid sequence intubation, chest tubes, and therapeutic medications and toxology for the critical care transport provider.

Welcome to the new gold standard in critical care transport training. Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), Critical Care Transport offers cutting edge content relevant to any healthcare provider training in critical care transport. Like no other textbook in this market, Critical Care Transport thoroughly prepares medical professionals to function as competent members of a critical care team by covering the material that everyone—paramedics, nurses, physicians, and specialty crew—needs to know to operate effectively in the prehospital critical care environment. This book meets the curricula of major critical care training programs, including University of Maryland, Baltimore County (UMBC). It covers both ground and flight transport, and meets the objectives of critical care transport certification exams such as the Certified Flight Paramedic (FP-C) exam administered by the Board for Critical Care Transport Paramedic Certification. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, trauma, and pharmacology are covered in the context of critical care. Chapters have been authored by leading critical care professionals across the country and represent the most current, state-of-the-art information on management of critical care patients.

SUCCESS! FOR THE CRITICAL CARE PARAMEDIC, 1/e by Dr. Bryan Bledsoe is the book to help students pass their National Registry and other certification exams. Blending a comprehensive collection of practice exam questions with helpful test-taking tips and student hints, all items reference the Department of Transportation's objectives. As you build confidence by digging into this rich content review, you'll find that the Brady/Prentice Hall Health test preparation system is a blueprint for success. SUCCESS! Is a complete review system that combines relevant exam-style questions with a self-assessment format to provide you with the best preparation for your exam!

Critical care medicine is one of the fastest-growing areas of practice, and Critical Care Study Guide, 1st ed., was the first reference to combine both concise text and reviews with questions. The second edition expands and improves coverage, including comprehensive studies in airway management, cardioversion and defibrillation, medical ethics, and the use of blood products. The unique combination of text with questions and answers makes this a crucial reference for all practitioners and residents who see patients in the Intensive Care Unit, and those planning to sit for medical boards.

Our textbook and live review course is APPROVED by the Board for Critical Care Transport Paramedic Certification (BCCTPC) and is used by our nationally recognized lecturers who present Review Courses for Certified Flight Registered Nurse (CFRN), Flight Paramedic-Certified (FP-C), Certification in Emergency Nursing (CEN), Critical Care Registered Nurse (CCRN), & Certified Transport Registered Nurse (CTRN). In addition to being industry recognized leaders in their field, several of our lecturers are also Editorial members with the à € œAir Medical Journal à € , having worked in the industry for a combined sixty years and have experience in Adult, Pediatric, Neonatal, Obstetric, Trauma, Emergency, and Critical Care. Our Instructors are also licensed by the Federal Aviation Administration (FAA) as Commercial rated Airplane and Helicopter Pilots. This book is sure to assist anyone wanting to expand their knowledge, better themselves clinically, or to prepare for any of these tough examinations.

Critical Care Paramedic is the first and only book written for the expanding field of critical care transport. Utilizing the successful format of Brady 's best-selling Paramedic Care: Principles & Practice, this book is both written and extensively reviewed by leading experts in the field. This comprehensive book addresses all aspects of critical care transport including: operations, safety, advanced pharmacodynamics, advanced physiologic monitoring, advanced airway management, medical emergencies, trauma emergencies, organ donation, and other important areas of critical care. Critical Care Paramedic will be the industry standard for critical care paramedic education and available only from Brady.

Whether you 're caring for patients on the ground or in the air, Patient Transport: Principles & Practice, 5th Edition is an essential tool for your success in transport nursing. Developed by ASTNA, this trusted, one-of-a-kind resource has been extensively revised to keep you up-to-date with the latest technological advances, and help you meet the ever-changing needs of this critical nursing field. Comprehensive overviews familiarize you with the most common conditions and injuries encountered in practice, accompanied by important management considerations to help you ensure the most effective communication and the safest patient care in all transport settings. In addition, expanded content on bariatrics are featured throughout the book, along with 350 online questions and answers mapped to the CRFN/CTRN® exams. Expanded coverage of injuries commonly encountered in flight and ground nursing includes pathophysiology, assessment, planning, implementation, and evaluation discussions. Information based on the latest updates from the Federal Aviation Association and the National Transportation Safety Board alerts you to important safety regulations. Meets the needs of all healthcare providers dedicated to expert care delivery in transport, including paramedics, physicians, respiratory therapists, pilots, mechanics and communication specialists. Detailed coverage of management issues includes scene management, communication, safety, disaster management/triage, quality management, and marketing/public relations. NEW! Extensive revisions throughout text includes detailed objectives for every chapter, expanded content on bariatrics, and updates to chapters including Scene Operations and Safety, Neurologic Trauma, Patient Safety, and Shock. NEW! Real-life scenarios with updated technology demonstrate how to apply concepts to scenarios similar to those you 'll encounter in practice. NEW! Focus on interprofessional and collaborative nature of transport, emphasizes the importance of teamwork in ensuring successful patient outcomes. NEW! Evolve site with 350 questions and answers mapped to the CRFN/CTRN® provide additional online preparation.
