One-Dimensional Man will vacillate throughout between two contradictory hypotheses: (1) that advanced industrial society is capable of containing qualitative change for the foreseeable future; (2) that forces and tendencies exist which may break this containment and explode the society. I do not think that a clear answer can be given.

The take off point for "One Dimensional Man" is the abridgement of language concepts for purposes of social control. Orwell was right. And how far we've come since Marcuse wrote his book! Now, anyone can think of countless egregious examples of how thought is constrained by one dimensional definitions, how freedom is usually a demonstration of repression and oppression. One-Dimensional Man The introduction of Herbert Marcuse's book, "One-dimensional Man," shows us the problem that a democratic society creates. Though this book was written back in 1964, many can agree that what he says is true in today's society. Different scenarios are also brought up to show us how things will be affected due to the advancements of technology.

Paul Sahre ranks alongside modern-day design heroes Stefan Sagmeister and Chip Kidd as one of the most influential graphic designers of his generation. *Two-Dimensional Man* is a fresh take on the traditional design monograph: part memoir, part art book, part meditation on creativity. Throughout, Sahre combines poignant personal essays about living creatively with artwork culled from his extraordinary 30-year career. In his revealing stories, Sahre portrays the creative life as one of constant questioning,

inventing, failing, dreaming, and--ultimately--making. In *Two-Dimensional Man*, Marcuse documents how moments like these have informed his life as a designer and artist, and proves that humor and meaning can be found anywhere, if you're only willing to look.

Originally published in 1964, *One-Dimensional Man* quickly became one of the most important texts in the ensuing decade of radical political change. This second edition, newly introduced by Marcuse scholar Douglas Kellner, presents Marcuse's best-selling work to another generation of readers in the context of contemporary events.

One of the most important texts of modern times, Herbert Marcuse's analysis and image of a one-dimensional man in a one-dimensional society has shaped many young radicals' way of seeing and experiencing life. Published in 1964, it fast became an ideological bible for the emergent New Left. As Douglas Kellner notes in his introduction, Marcuse's greatest work was a 'damning indictment of contemporary Western societies, capitalist and communist.' Yet it also expressed the hopes of a radical philosopher that human freedom and happiness could be greatly expanded beyond the regimented thought and behaviour prevalent in established society. For those

who held the reigns of power Marcuse's call to arms threatened civilization to its very core. For many others however, it represented a freedom hitherto unimaginable.

Central to this original study, first published in 1974, is that Political Man is also Symbolist Man, that man is two-dimensional. The book explores the possibilities of the systematic study of the dialectical interdependence between power relationships and symbolic action in modern, complex society. The discussion focuses on the processes by which interest groups, that cannot organise themselves formally, manipulate

different types of symbolic formations to articulate a number of basic organisational functions: distinctiveness, communication, decision-making, authority, ideology and socialisation. The analysis is worked out in terms of specific case studies of different types of groupings, or 'invisible organisations' – ethnic, elitist, religious, ritually secret, cousinhood – which go through processes of cultural metamorphosis, shifting from one symbolic strategy to another, in response to changes in their circumstances. In conclusion, the discussion is brought to bear on the study of stratification in large-scale industrial society generally.
