Ice, along with speed and base, is a form of the potent stimulant drug methamphetamine. Also referred to as shabu, crystal, crystal meth or d-meth, ice is the purest and most potent form of methamphetamine. It comes as a powder or crystals that are usually snorted, injected or smoked.

What happens to your body when you use ice? - ABC News

A report on ice users in Australia noted that almost half the ice users who were studied had physical problems including weight loss and heart palpitations. Staph infections resulting in sores on the body are possible and can easily be spread among meth users as they compulsively pick at and scratch their bodies due to hallucinations of bugs crawling under the skin.

Effects of Ice Abuse - Narconon International

Severe traumatic injuries, sepsis, pneumonia or shock can trigger the sudden infiltration of white blood cells into the lungs along with fluid buildup in the lungs. High altitudes. High-altitude pulmonary edema (HAPE) can develop in mountain climbers, hikers, skiers, or people that travel to or reside in high-altitude locations that are above 8,000 feet (about 2,400 meters) without first becoming acclimated.

Fluid in the Lungs: Major Causes and Best Treatments | MD ...

The whole logic behind the theory is that the hot smoke flowing through the ice cubes causes water vapor to collect in your lungs, leading to severe bronchitis and other lung related issues. The water vapor is so cold that it can freeze, causing strain and stress to your lungs.

Ice Cubes in Your Bong: Yes or No? - Vocal

After the serum sample collection, lung, large intestine, stomach, kidney, spleen, heart, brain, and liver tissues were rinsed in ice cold phosphate-buffered saline (PBS: pH 7.5), then dried, and weighed. Afterwards, the tissues were homogenized by using a glass homogenizer on ice, with 10 mL/g of ice cold PBS.

5 Best Ice Bong: Which Is Right for You? (2020) | Heavy.com

The term "lung pain" actually is a misnomer, because there are no pain receptors in the lungs, and those in the thorax (the chest cavity) provide the brain with only vague information about the precise location of pain. What may seem to be lung pain may be related to asthma or another pulmonary concern.
