Denis De Beaulieu, a French soldier, is made a prisoner by the Sire of De Maletroit, who believes that the soldier has compromised the Maletroit family honor.

The Tempest is a play by William Shakespeare, probably written in 1610-1611, and thought to be one of the last plays that Shakespeare wrote alone. After the first scene, which takes place on a ship at sea during a tempest, the rest of the

story is set on a remote island, where the sorcerer Prospero, a complex and contradictory character, lives with his daughter Miranda, and his two servants--Caliban, a savage monster figure, and Ariel, an airy spirit. The play contains music and songs that evoke the spirit of enchantment on the island. It explores many themes, including magic, betrayal, revenge, and family. In Act IV, a wedding masque serves as a play-within-the play, and contributes spectacle, allegory, and elevated language.

"The classic Wordsworth poem is depicted in vibrant illustrations, perfect for pint-sized poetry fans."

"'Will you walk into my parlour,' said the Spider to the Fly..." is easily one of the most recognized and quoted first lines in all of English verse. But do you have any

Quibb idea how the age-old tale of the Spider and the Fly ends? This enduring verse from Mary Howitt dates back to the nineteenth century, but its warning - to beware the wiles of flattery - remains today as relevant as ever. Now in its tenth year, celebrated artist Tony DiTerlizzi, drawing inspiration from his love of classic Hollywood horror movies of the 1920s and 1930s, shines a cinematic spotlight on Mary Howitt's warning, written to her own children about those who use sweet words to hide their not-so-sweet intentions. Featuring new jacket art and a commemorative poster this special 10th anniversary edition of the quintessential cautionary tale is a must have!

John Ray (1627 – 1705) contributed several important concepts to the field of plant taxonomy: first, the division of plants into groups based on seed leaves

(Monocotyledonae and Dicotyledonae); second, the differentiation between flowering and flowerless plants; third, the use of the term “ petal ” to designate the “ leaf ” of the flower; fourth, the use of stamens and pistils in plant classification, anticipating the emphasis of Linnaeus. Ray worked towards a natural classification of plants that was based on more than one “ data set ” : classification should not use a single character but ideally should make use of as much information as was available for as many parts of the plant as possible. In this way his work foreshadowed that of Lamarck, de Jussieu and de Candolle in France, and then Bentham and Hooker in England. He worked to popularise the study of plants, to bring it to the level of science, and to systematise previous knowledge of plants into a workable whole. If not for the innovative use of binomials by Linnaeus,

perhaps John Ray might have been more widely remembered as the true “ Father of Plant Taxonomy ” . Ray sets out his 'new' classification of plants in Methodus Plantarum Nova and discusses some basic aspects of their biology. This book is its first English translation: though occupying an important place in the history of Botany, hitherto it has been available only in its original language, Latin.

The cricket spends the warm summer days playing and singing while the ant collects food. What will happen when winter comes?

The great French zoologist Lamarck

(1744-1829) was best known for his theory of evolution, called 'soft inheritance', whereby organisms pass down acquired characteristics to their offspring. Originally a soldier, Lamarck later studied medicine and biology. His distinguished career included admission to the French Academy of Sciences (1779), and appointments as Royal Botanist (1781) and as professor of zoology at the Mus é e Nationale d'Histoire Naturelle in 1793. Acknowledged as the premier authority on invertebrate zoology, he is credited with coining the term 'invertebrates'. In this 1809 work, translated into English in 1914, he outlines his theory that under the pressure of different external circumstances, species can develop variations, and that new species and genera can eventually evolve as a result. Darwin paid tribute to Lamarck as the man who 'first did the eminent service of
