the problem of randomness and success using the state of the art scientific arsenal we have. Barabasi is the person." --Nassim Nicholas Taleb, author of the New York Times bestselling *The Black Swan* and Distinguished Professor of Risk Engineering at NYU An international bestseller In the bestselling tradition of Malcom Gladwell, James Gleick, and Nate Silver, prominent professor László Barabási gives us a trailblazing book that promises to transform the very foundations of how our success-obsessed society approaches their professional careers, life pursuits and long-term goals. Too often, accomplishment does not equal success. We did the work but didn't get the promotion; we played hard but weren't recognized; we had the idea but didn't get the credit. We convince ourselves that talent combined with a strong work ethic is the key to getting ahead, but also realize that combination often fails to yield results, without any deeper understanding as to why. Recognizing this striking disconnect, the author, along with a team of renowned researchers and some of the most advanced data-crunching systems on the planet, dedicated themselves to one goal: uncovering that ever-elusive link between performance and success. Now, based on years of academic research, *The Formula* finally unveils the groundbreaking discoveries of their pioneering study, not only highlighting the scientific and mathematic principles that underpin success, but also revolutionizing our understanding of: Why performance is necessary but not adequate Why "Experts" are often wrong How to assemble a creative team primed for success How to most effectively engage our networks And much more.

What do successful organizations and smart leaders have in common? They deliver outstanding value to their stakeholders.

Interviews with over 80 leading organizations in private, public and third sectors from all over the world have led Andrew Kakabadse to a fascinating insight: organizations where stakeholder engagement was highest were not those led by charismatic and visionary leaders, but by a culture of delivering outstanding value. Through his research, he found two different approaches at work. In strategy-led organizations, senior management has a clear notion of how value can be created and enacts a strategy to achieve it with the support of key managers and board members. Value-delivery-led organizations approach value creation differently. In these organizations, the leadership gathers evidence from internal and external stakeholders to determine the value the organization is delivering today and can deliver in the future. A strategy is then put in place to support those findings – and is deliberately exposed to challenges from stakeholders to create engagement. The Success Formula demonstrates how value-delivery-led organizations are outperforming their strategy-led counterparts and how the world's best organizations deliver value to their stakeholders, with examples drawn from Anglo American, Deutsche Bank, Citibank, Jaguar/Landrover, Microsoft, BMW and Alfa Bank. This authoritative guide shows leaders how to improve the way they gather meaningful evidence to create a value-delivery culture that maximizes the benefits for their organizations and stakeholders.
