*Sustainable Design A Critical David Bergman*

The intention of sustainable design is to "eliminate negative environmental impact completely through skillful, sensitive design". Manifestations of sustainable design require renewable resources, impact the environment minimally, and connect people with the natural environment.

*Sustainable design - Wikipedia*

Sustainable design is the term we've chosen to represent the intelligent application of the principles of sustainability to the realm of engineering and design. This guide focuses on products and similar manufactured components, but the same principles can also apply to architecture, civic planning, and other realms of the "built."
