experimentation does not extend beyond adolescence, ceasing as identity becomes settled with maturity. Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies.

Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems. This

Accordingly adolescents lack mature capacity for self-regulations because the brain system that influences pleasure-seeking and emotional

The youth culture is on everyone's lips today, as pressures build to ban controversial song lyrics, reintroduce school prayer, and prohibit teenagers' access to contraceptives. It's not the first time Americans have been

By mid-decade, the nation had reached a pitch of near obsession with the harmful effects of film, radio, comic books, and television on American youth. Experts across the land denounced mass culture as
