I am a welcoming and enthusiastic therapist with the ability to help youth manage their behavior and emotional state in a moment of crisis or through major life transitions. I have a unique ...

As the demand for thoroughly trained workers in crisis intervention has grown for those working with emotionally and behaviorally disturbed youth, the need for effective trainers of crisis intervention has also increased. An effective training for trainers program includes teaching and evaluating knowledge/skills in a core curriculum in conjunction with developing training skills. This study provided empirical and anecdotal evidence about a particular crisis intervention train-the-trainer program, Therapeutic Crisis Intervention (TCI), that enabled TCI to make a major shift of emphasis in the training from core curriculum knowledge and skills to training skills development. The study may provide a valuable model for others to use when assessing their training programs whether crisis intervention related or any other training for trainers program.

Social workers have roles that require them to engage with clients and families who may be 'reluctant clients', ambivalent or resistant towards those seeking to help and protect. This includes safeguarding roles in relation to children and vulnerable adults, and work to engage with marginalised groups such as young offenders and those with mental health and substance misuse problems. The text addresses issues in relation to the main client groups, and specific chapters take an overview of issues such as understanding and defusing aggressive behavior and keeping yourself safe from assault.

A practical guide for health professionals and trainers, offering evidence-based low arousal approaches to defusing and managing aggressive behaviours in a variety of health care settings. Provides both an academic background and practical advice on how to manage and minimize confrontation Illustrates low arousal approaches and offers clear advice on physical restraint and the reduction of these methods Describes the evidence base for recommended approaches Includes a wide range of valuable case examples from a variety of care settings

Friendship, Love, and Hip Hop investigates how young Black men live and change inside a mental institution in contemporary America. While the youth in Hejtmanek's study face the rigidity of institutionalized life, they also productively maneuver through what the author analyzes as the 'give' - friendship, love, and hip hop - in the system.

The psychologist examines trends in violence by young boys, analyzing his twenty-five years of work with violent adolescents to develop recommendations for preventive measures

Draws on recent research to address key issues in residential child care policy and practice in the UK, offering guidance for developing best practice and improved outcomes for children and young people.

'The book reveals itself to be both a scholarly and practical resource that will be indispensable to anyone seeking insight and direction for understanding and responding to EBD in the 21st century' - Professor Paul Cooper, The University of Leicester

This work offers effective intervention strategies for managing school violence. Opening with a range of perspectives on student aggression, it provides a comprehensive view on practical interventions at the student, school, and systems levels. Practitioners present empirically-grounded strategies for an array of school settings and situations, seeking to help readers make informed decisions about the approaches that would be most effective in their own environments.; The first part of the text presents information on the nature and prevalence of youth violence today, and outlines strategies geared toward making the school physically safer, establishing clear behaviour standards, providing adequate adult presence, enforcing rules fairly and sanctioning offenders, and creating partnerships with outside agencies.; The chapters that follow describe a range of interventions directed toward aggressive students themselves which have proved highly effective in outcome evaluation research. These approaches include behavioural classroom management, crises- and gang- orientated interventions, and preventative pre-school programmes. In addition, it details school-orientated strategies such as academic and curriculum interventions, vandalism control, and effective security policy. Exploring the complex relationship among school behaviour, family life, and community, chapters also consider avenues toward effecting change in the larger context of the students' lives.; A hands-on manual for dealing with some of the most intractable problems education professionals face, this book offers extensive information for school psychologists and researchers.
