And Evaluation, under the NEC, ICE and FIDIC forms of contract, both in the UK and overseas. It has a format designed for more effective costing and ease of computerisation, and has features that differ from other forms of measurement.

CESMM3 - Civil Engineering Standard Method of Measurement

Bill of quantities (BQ or BOQ) is prepared by the client's quantity surveyor or cost manager. The quantities are measured in number, length, area, volume, weight or time. BOQ helps to contractors get an itemized list of materials, equipment, and labour (with their costs) required to build new projects, maintain, or repair existing structures.

Measurement, Third edition. The Civil Engineering Standard Method of Measurement - CESMM has been well-established for 15 years as the standard for the preparation of bills of quantities in civil engineering work. This third edition, CESMM3, brings the method into line with changes in industry practices and extends its usage into several new areas.

Civil Engineering Standard Method of Measurement

The valuation of variations and agreement to the cost of delays have generally been the main causes of dispute on civil engineering contracts. Contractors frequently claim that the measured quantities of permanent work priced at billed rates do not represent the true value of constructional work where significant variations have occurred.
