In Winter World: The Ingenuity of Animal Survival, biologist, illustrator, and award-winning author Bernd Heinrich explores his local woods, where he delights in the seemingly infinite feats of animal inventiveness he discovers there. Because winter drastically affects the most elemental component of all life--water--radical changes in a creature's physiology and behavior must take place to match the demands of the environment.

From flying squirrels to grizzly bears, and from torpid turtles to insects with antifreeze, the animal kingdom relies on some staggering evolutionary innovations to survive winter. Unlike their human counterparts, who must alter the environment to accommodate physical limitations, animals are adaptable to an amazing range of conditions. Examining everything from food sources in the extremely barren winter land-scape to the chemical composition that allows certain creatures to survive, Heinrich's Winter World awakens the largely undiscovered mysteries by which nature sustains herself through winter's harsh, cruel exigencies.

Presents a detailed investigation into the feeding behavior of ravens during four winters in Maine and comes up with several unexpected conclusions.

A third edition of a classic work on cold climate ecosystems, updated with a new chapter on mammals and birds.

This guide to various aspects of winter includes stresses of cold temperatures on animals, plants and people, coping behaviours and mechanisms, the forces of winter and the human perception and experience of the season.

The award-winning author of Winter World presents an accessible discussion of animal survival in the hot season, exploring the ways in which animals make the most of the summer's short span by efficiently compacting most of their procreative and survival activities.

"Bernd Heinrich is one of our greatest living naturalists in the tradition of Gerald Durrell....A national treasure." —Los Angeles Times Summer World is an intimate, accessible, and eloquent illumination of animal survival in the Summer months from Bernd Heinrich, bestselling author of Winter World and "our latter-day Thoreau" (Publishers Weekly). Pulitzer Prize-winner Edmond O. Wilson (On Human Nature) calls Heinrich's fascinating exploration and appreciation of the natural order a "lovely book, meticulously etched and based on impassioned but exacting scientific research," while the New York Times Book Review raves, "Animals come to life in gripping detail...and so does Heinrich.... The man is irrepresible."

Describes the animal world's treatment of death, from animal burial and prey disposal behaviors to the important role of humans as scavengers.

"Each new page [is] more spellbinding than the one before—this is surely one of the most interesting books I've ever read."—Elizabeth Marshall Thomas, author of The Hidden Life of Dogs When Bernd Heinrich decided to write a memoir of his ultramarathon running experience he realized that the preparation for the race was as important, if not more so, than the race itself. Considering the physiology and motivation of running from a scientific point of view, he wondered how he could learn from other animals. In Why We Run, Heinrich considers the flight endurance of birds, the antelope's running prowess and limitations, and the ultra-endurance of camels to understand how human physiology can or cannot replicate these adaptations. With his characteristic blend of scientific inquiry and philosophical musings, Heinrich offers an original and provocative work combining the rigors of science with the passion of running.

Although Gerd Heinrich, a devoted naturalist, specialized in wasps, Bernd Heinrich tried to distance himself from his "old-fashioned" father, becoming a hybrid: a modern, experimental biologist with a naturalist's sensibilities. In this extraordinary memoir, the award-winning author shares the ways in which his relationship with his father, combined with his unique childhood, molded him into the scientist, and man, he is today. From Gerd's days as a soldier in Europe and the family's daring escape from the Red Army in 1945 to the rustic Maine farm they came to call home, Heinrich relates it all in his trademark style, making science accessible and awe-inspiring.

2021 winner of the Philip K. Dick Award for A 2020 The Rumpus Book Club Selection "Blends a rural thriller and speculative realism into what could be called dystopian noir.... Profoundly moving."—Library Journal, starred review In an endless winter, she carries seeds of hope Wylodine comes from a world of paranoia and poverty—her family grows marijuana illegally, and life has always been a battle. Now she's been left behind to tend the crop alone. Then spring doesn't return for the second year in a row, bringing unprecedented, extreme winter. With grow lights slashed in her truck and a pouch of precious seeds, she begins a journey, determined to start over away from Appalachian Ohio. But the icy roads and strangers hidden in the hills are treacherous. After a harrowing encounter with a violent cult, Wil and her small group of exiles become a target for the cult's volatile leader. Because she has the most valuable skill in the climate chaos: she can make things grow. Urgent and poignant, Road Out of Winter is a glimpse of an all-too-possible near future, with a chosen family forged in the face of dystopian collapse. Both gripping and lyrical, Stine's vision is of a changing world where an unexpected hero searches for where hope might take root. "Richly imagined, deeply moving and unthinkably offers hope in a world that uncannily resembles ours.... Gloriously well-written." —Ms. Magazine
